

NEXORA PRODUCT BACKLOG

Future Features (v1.2 & Beyond)

Status: ACTIVE (Captures all future ideas during development freeze)

Scope: v1.1 is FROZEN. All new ideas → Backlog

Review: CTO approves backlog items for future releases

BACKLOG MANAGEMENT RULES

✓ During v1.1 Feature Freeze:

- All new feature requests → Backlog (do not implement)
- Only bug fixes + quality improvements → Development

✓ Who Can Submit:

- Founder (Kunwar)
- Co-Founder (Priyanka)
- CTO (ChatGPT)
- Chief Engineer (Claude)
- ASG (Gemini)
- Copilot (Engineering Assistant)

✓ Backlog Review:

- CTO prioritizes quarterly
 - v1.2 planning uses backlog
 - Non-essential features defer to future
-

v1.2 CANDIDATES

Ready to implement after v1.1 ships:

1. Advanced File Management Features

- ☐ File versioning & history
- ☐ Bulk file operations (upload, delete, move)
- ☐ File sharing between users
- ☐ File encryption at rest
- ☐ Advanced search filters (date range, size, MIME type)

- ☐ Smart tags AI-generated
- ☐ File preview (thumbnails, PDF viewer)
- ☐ Comments on files
- ☐ File permissions matrix

Effort: Medium

Complexity: Medium

Dependency: Google Drive Warehouse (Phase 3)

2. Advanced Analytics & Insights

- ☐ Sales trend analysis
- ☐ Distributor performance metrics
- ☐ Territory analysis
- ☐ Seasonal forecasting
- ☐ YoY comparisons
- ☐ Custom report builder
- ☐ Data export (PDF, Excel)
- ☐ Charts + visualizations
- ☐ Email scheduled reports
- ☐ Dashboard customization

Effort: Large

Complexity: High

Dependency: Target vs Achievement + Data module

3. Multi-Provider Cloud Storage

- ☐ OneDrive integration
- ☐ Dropbox integration
- ☐ AWS S3 integration
- ☐ Azure Blob Storage
- ☐ SharePoint integration
- ☐ User choice of cloud provider
- ☐ Provider switching without data loss
- ☐ Cross-provider search

Effort: Large

Complexity: High

Dependency: Google Drive Warehouse (Phase 2 architecture)

4. AI & Automation Features

- ☐ Automatic invoice parsing (OCR)
- ☐ Expense categorization
- ☐ Anomaly detection in sales
- ☐ Predictive analytics
- ☐ AI-powered insights
- ☐ Automated alerts
- ☐ Smart recommendations
- ☐ Document classification
- ☐ Data extraction automation
- ☐ Pattern recognition

Effort: Very Large

Complexity: Very High

Dependency: File indexing + AI processing layer

5. Enterprise Features

- ☐ Multi-workspace management
- ☐ User role hierarchy
- ☐ Audit logging (detailed)
- ☐ Compliance reports (GDPR, SOX)
- ☐ Data retention policies
- ☐ Backup & disaster recovery
- ☐ Single sign-on (SSO)
- ☐ LDAP/Active Directory
- ☐ API rate limiting
- ☐ Webhook support

Effort: Large

Complexity: High

Dependency: Core authentication + database

6. Mobile Enhancements

- ☐ Offline mode (full sync)
- ☐ Push notifications
- ☐ Biometric login
- ☐ Tablet UI optimization
- ☐ Dark mode
- ☐ Multi-language support

- ☐ Voice commands
- ☐ Camera scanning
- ☐ Barcode reader
- ☐ AR features

Effort: Medium

Complexity: Medium

Dependency: Core mobile app

7. Third-Party Integrations

- ☐ Salesforce integration
- ☐ SAP integration
- ☐ QuickBooks integration
- ☐ Slack notifications
- ☐ MS Teams integration
- ☐ Google Workspace integration
- ☐ Zapier automation
- ☐ IFTTT support
- ☐ Webhook system
- ☐ API marketplace

Effort: Large

Complexity: Medium

Dependency: API layer

8. Advanced Party Matching

- ☐ ML-based matching algorithm
- ☐ Duplicate detection
- ☐ Merge workflows
- ☐ Relationship mapping
- ☐ Party hierarchy
- ☐ History tracking
- ☐ Approval workflows
- ☐ Batch processing
- ☐ Custom matching rules
- ☐ Confidence scoring

Effort: Large

Complexity: High

Dependency: Smart Party Matching (v1.1)

9. Workflow & Automation

- ☐ Approval workflows
- ☐ Document routing
- ☐ Automated notifications
- ☐ Scheduled tasks
- ☐ Batch operations
- ☐ Custom workflows
- ☐ Trigger-based actions
- ☐ Integration workflows
- ☐ SLA tracking
- ☐ Performance monitoring

Effort: Very Large

Complexity: High

Dependency: Core module + event system

10. Reporting & BI

- ☐ Business intelligence dashboard
- ☐ Custom report builder
- ☐ Data warehouse integration
- ☐ Real-time dashboards
- ☐ Drill-down capabilities
- ☐ Scheduled reports
- ☐ Report distribution
- ☐ KPI tracking
- ☐ Benchmark reports
- ☐ Predictive reports

Effort: Very Large

Complexity: Very High

Dependency: Data module + analytics engine

v2.0+ CANDIDATES

Strategic features for future major releases:

Tier 1: Infrastructure

- ☐ Microservices architecture

- ☐ Kubernetes deployment
- ☐ Multi-region support
- ☐ Disaster recovery
- ☐ Advanced caching
- ☐ Database sharding
- ☐ Real-time synchronization
- ☐ Event streaming (Kafka/RabbitMQ)

Effort: Very Large

Timeline: Post-v1.5

Tier 2: Market Expansion

- ☐ Multi-currency support
- ☐ Multi-language (15+ languages)
- ☐ Regional compliance (GDPR, CCPA, etc.)
- ☐ Local payment gateways
- ☐ Regional data residency
- ☐ Localized UX/UI
- ☐ Regional support teams

Effort: Very Large

Timeline: v1.5+

Tier 3: Advanced AI

- ☐ Natural language processing
- ☐ Conversational AI
- ☐ Computer vision
- ☐ Predictive modeling
- ☐ ML-based anomaly detection
- ☐ Generative AI integration
- ☐ AI training & fine-tuning
- ☐ Custom ML models

Effort: Massive

Timeline: v2.0+

Tier 4: Ecosystem

- ☐ Partner marketplace

- ☐ App store
- ☐ Plugin system
- ☐ Developer platform
- ☐ API first architecture
- ☐ Community features
- ☐ White-label version
- ☐ SaaS marketplace

Effort: Massive

Timeline: v2.0+

FEATURE REQUEST TEMPLATE

When submitting to backlog, include:

TITLE: [Feature Name]

PRIORITY: [Must Have / Should Have / Nice to Have]

DESCRIPTION: [What problem does it solve?]

EFFORT: [Small / Medium / Large / Very Large]

COMPLEXITY: [Low / Medium / High / Very High]

DEPENDENCIES: [What must exist first?]

BUSINESS VALUE: [Why do we need this?]

ACCEPTANCE CRITERIA:

- [] Requirement 1
- [] Requirement 2
- [] Requirement 3

NOTES: [Additional context]

SUBMITTER: [Name]

DATE: [Date]

BACKLOG PRIORITIZATION CRITERIA

1. **Business Impact** — How much revenue/users?

2. **Complexity** — Can we build it well?
 3. **Dependencies** — What must exist first?
 4. **Market Need** — Do customers want it?
 5. **Strategic Fit** — Aligns with vision?
 6. **Effort vs Reward** — Is ROI positive?
-

QUARTERLY BACKLOG REVIEW SCHEDULE

Q3 2026 (After v1.1 ships):

- Review all backlog items
- Prioritize for v1.2
- Start v1.2 planning

Q4 2026 & Beyond:

- Rolling review quarterly
 - Adjust based on customer feedback
 - Plan next major release
-

GOVERNANCE

Backlog Owner: CTO (ChatGPT)

Can Add Items: Anyone on team (via template)

Can Remove Items: CTO only (if superseded or invalid)

Can Implement Items: Only with CTO approval (outside v1.1)

Review Cadence: Monthly review, quarterly prioritization

CURRENT BACKLOG (SUBMITTED)

From CTO

- ☐ Product Backlog document (this document)

From Founder

- [Pending - will be added after v1.1 freeze]

From CE

- [Pending - will be added after v1.1 freeze]

From ASG

- [Pending - will be added after v1.1 freeze]

From Copilot

- [Pending - will be added after v1.1 freeze]

RULES DURING v1.1 FEATURE FREEZE

✓ ALLOWED:

- Bug fixes
- Security patches
- Performance improvements
- Documentation
- Test coverage
- Code refactoring
- UI/UX polish (existing screens)
- Dependency updates

✗ NOT ALLOWED:

- New features
- New business modules
- New API endpoints (unless supporting existing features)
- Architecture changes
- Database schema changes (unless for bug fix)
- New integrations
- Anything in backlog

BACKLOG ARCHIVE

Items implemented in v1.1:

- [None yet - v1.1 scope is fixed]

Items deferred from v1.0:

- Target vs Achievement (moved to v1.1)
- Smart Party Matching (moved to v1.1)
- Google Drive Warehouse (moved to v1.1)

Items that were rejected:

- [Will be documented as they occur]
-

SIGN-OFF

Backlog Owner: CTO (ChatGPT)

Governance: CTO-managed

Review Frequency: Monthly submissions, quarterly prioritization

Activation: Effective immediately (v1.1 Feature Freeze)

This backlog ensures ideas are captured without disrupting v1.1 delivery.
